

Debtmaster® Outbound

Agent Accelerator

Are your agents keeping up with their daily work lists?

- **Eliminate** wasted time in between accounts with integrated Paced Power Dialing.
- **Eliminate** manual phone number dialing and keystroke mistakes with Click-to-Dial features.
- **Eliminate** the time-wasting delays of listening to answering machines.
- **Eliminate** guesswork associated with incomplete agent productivity reports. Call activity is tracked and blended into single-source Debtmaster reporting.

“For us, the decision was easy to use technology over hiring more collectors”

C. Truman

Power Dialing

Account Placements up, collectability down? If this sounds familiar, you know your agency has to work harder than ever to reach daily and monthly goals.

If you are like many agencies, it simply boils down to a numbers game. The more accounts a collector can work, the more collections they can bring in.

When you add **Power Dialing** to your Debtmaster system, collectors can churn through their work lists faster and with more accuracy. The system can

keep collectors on pace by dialing their accounts for them; eliminating the natural procrastination time that typically occurs in between accounts.

For High Balance or more complex accounts, collectors can run Power Dialing in “Preview Mode” to allow for more file study time in between accounts.

Increased call capacities means more dollars collected with the agents you already have. And because every call is tracked, you now have the unified reports to prove performance.

Answering Machine Handoff

Statistics show that debtor answering machines can easily bog down collectors with 40% of their calls or more! With Answering Machine Handoff, collectors can instantly pass those connections along to their own pre-recorded answering machine response system. Messages can even be customized with the Debtors name via CallThru's text-to-speech engine.

This frees the collector up to place another call without listening to the message or waiting for the “beep”. In fact, collectors can have as many a 3 or more answering machines in queue at any given time! Combine Answering Machine Handoff and Power Dialing for the ultimate contact accelerator.

Plus, you receive **all the powerful features CallThru® has to offer like Voice Broadcasting, Call Recording, Inbound Call Recognition, and so much more! We invite you to make the next move and see the power of Comtronic's fully integrated Agent Accelerator today!*
